

Computer Viruses

Computer Viruses

**What is a
virus?**

A virus is simply
a **program**
designed to
cause harm to a
computer.

**How do
you catch
a virus?**

The most common
cause of infection
is from **e-mail
attachments.**

**How can
they be
prevented?**

Use up-to-date
anti-virus software
and do not open any
emails that you think
are suspicious, **delete**
them!
